# SPC Milestone Plugin

Overview:

The SPC Milestone plugin integrates with the Milestone VMS software to achieve an in-depth integration of the two systems.

The SPC Milestone plugin allows users to trigger events such as alarms or status changes and to control SPC systems within the Milestone system.

When installed, the plugin allows a 30-day trial for up to two panels and will allow the display of areas, zones, doors and outputs from the SPC system. The plugin uses an IP-based, bi-directional and 256 bit AES with CBC encrypted FlexC® to communicate with the SPC control panel.

Vanderbilt is offering 2 license packages starting with a 5 SPC panel license up to a 20 SPC panel license. The license also provides customers with one year of support and updates.

Features & Benefits:

✓ Alarm Management

The operator will have the ability to control areas set and unsetting the system from within the Milestone front end. The operator will also be able to control zones, outputs and doors on the SPC system. The system can be configured so that the graphical interface can be used to control all of these elements

✓ Events Triggering (bi-directional)

The plugin will allow you to trigger events on the milestone system based on events from the SPC system. You will also be able to trigger actions on the SPC based on events the milestone system. Should the milestone system detect a fault it can now trigger the SPC to perform an action.

✓ Secure IP Communications

Using the SPC FlexC® communications protocol the installer uses a common setup to configure the communications and has the peace of mind that communicates are secure and reliable.

Key Features:

- Supports up to 20 SPC controllers
- Plug and play installation
- Alarm Management
- Event-based Rule Engine
- 256 bit AES with CBC encrypted communication
